About This Game

The Metronomicon features an engaging story mode with a colourful cast of musically-empowered heroes and villains. The Metronomicon sees you take control of a party of eight newly graduated masters of the “rhythmic combat arts” to wage musical warfare against a multitude of dance-mongering fiends. By switching between four concurrent hero-controlled tracks on-the-fly, you’ll select and activate a wide array of abilities and spells, buffs and nukes, with your performance and timing all-important in ensuring the effectiveness of your moves. In the RPG spirit, you’ll need to improve your characters’ stats, hunt down powerful equipment, and combine a multitude of newly-learned abilities – switching between tanking, healing, buffing, and damage-dealing classes as required in real time.

Look this game is absolutely amazing, when Discord gave current nitro users 1-2 years free access (depending on your sub) to their game library I found this game. Possibly the greatest thing to happen since I've had a blast probably putting quite a big play time into the game through discord

Now why am I buying it on here? Well there's two reasons, one is that I simply want to actually buy the game and have the DLC and two, discord not letting you switch payment for your nitro so I lost my free year

Anyway enough of that. An indie game like this will always have new songs that I'll get addicted to and my spotify has never been the same after this. Do buy it
